

TJERNLUND PRODUCTS
Radon Mitigation Products Webinar

2012

Instructor: John Sterner

A. Description

This 30 minute webinar is designed to offer information and marketing strategies on the Radon Mitigation Products offered by Tjernlund. It will cover the different models available, their design and specifications and the typical applications where these products will be used. The instructor will give benefits of utilizing the equipment while providing the necessary information needed to promote and apply these systems.

B. Course Objective

1. To familiarize representatives, engineers, salesmen, contractors or any other learner with this Tjernlund Products, Inc. system.
2. To provide the learner with the opportunity to understand the Radon Mitigation Products and the use of each model.
3. To provide the necessary information needed to promote and apply these systems.
